## **Final Project Progress Report**

### ***Changes***

**Agent behavior:** Graphically, the agents move based on their confidence levels. This gives the user a graphic interpretation of the status of the agents (instead of just their colors).

**System behavior:** N/A

**Rationale for agent rules:** N/A

**Model output:** There have been no significant changes.

**Questions:** There have been no significant changes

**Next steps:** Create a input box with key words to trigger confidence changes.

**Notes:** I injured my knee late last week, so I have not had much time to work. The doctor recommended me to stay home and not move around until the swelling has gone down.
